UCC is a memory that closely resembles a credit card in shape. The unique format allows the pendrive to be carried in a wallet, which will allow you to share saved data in any situation.

The card is also perfect as a company gadget - you can print business card data on it, upload a presentation to a USB drive and use it at business meetings.

All GOODRAM USB flash drives are manufactured on the basis of carefully selected components and undergo multi-stage quality tests before they go out into the world, which is why we guarantee users a lifetime warranty.
