The UME is a classic design enlivened by the intensity of the case colours. Thanks to the plug equipped with a convex anti-slip pattern, opening the USB port is easy in any situation. Once the plug is removed, it can be easily attached to the other end of the case, minimising the risk of losing it. Thanks to the perforation for attaching the pendant, the UME USB flash drive is the ideal solution for users who want to keep their data always at hand.

UME is our proprietary design and an officially registered design. This gives us 100% exclusivity for this unique design. What's more, the material and the housings themselves are provided to us by a Polish, trusted supplier, thanks to which we can freely expand the UME family with new colors and unique views.

All GOODRAM USB flash drives are manufactured on the basis of carefully selected components and undergo multi-stage quality tests before they go out into the world, which is why we guarantee users a lifetime warranty.
