The UTS flash drive is the most classic model of all the USB sticks produced by the Goodram brand. The UTS is also very popular as a promotional gadget. Its greatest advantage is the rotating locking system for convenient use. In addition, the casing is available in a wide range of colours – it will go well with any advertising print.

The classic UTS housing makes the flash drive gain recognition among supporters of practical solutions. The well-thought-out design of the UTS memory means that the flash drive can be easily attached to a lanyard, which will allow you to use it at any time. The rotating USB closing system and the lack of a plug will allow you to enjoy the memory even the most absent-minded.

All GOODRAM USB flash drives are manufactured on the basis of carefully selected components and undergo multi-stage quality tests before they go out into the world, which is why we guarantee users a lifetime warranty.
