

## GOODRAM Industrial announces its participation at Embedded World 2018

This year's edition of Embedded World, the international industrial trade show for embedded systems will be held from February 27th to March 1st in Nuremberg, Germany. The list of exhibitors from around the world, includes a polish company Wilk Elektronik, which will present its industrial memory lineup under GOODRAM Industrial brand.

Laziska Gorne, 19 February 2018

At its booth (Hall No. 2, Stand No. 2-541), GOODRAM Industrial will showcase a full range of NAND-based industrial storage products including popular Solid State Drive form factors from 2,5" SATA through mSATA and mSATA mini to M.2 as well as removable storage products such as Flash Drives as well as microSD, SD, CFast and Compact Flash memory cards. Naturally GOODRAM will also present all generations of their acclaimed industrial DIMM And SO-DIMM memory modules.

Since 2013, GOODRAM Industrial memory has been successfully implemented in number of industrial applications, such as video recorders, POS solutions, parking meters, ticket machines, parcel lockers, control cabinets and many other applications operating under harsh conditions and where any downtimes are not allowed.

- Wilk Elektronik is the only manufacturer of industrial memory in the CEE region and one of only few in Europe. Features which distinguish our brand are: customer support throughout the product life, ensuring the long-term product availability and putting major focus on quality says Wiesław Wilk, CEO of Wilk Elektronik.

To ensure continued quality, all products are manufactured in GOODRAM factory in Poland and are assembled only from the industrial-grade components coming from the major chip suppliers, resulting in the highest possible reliability, customers can expect. Furthermore, Wilk Elektronik ensures fixed BOM and extended temperature range for all products. Last but not

least, efficient PCN and EOL management, guarantees peace of mind and assures that customers can rely on GOODRAM Industrial anytime and anywhere.

- Environmental testing in climate chambers, supplemented with our in-house designed hightemperature verification platforms to ensure extended operating temperature ranges, over 300 testing platforms with in-house designed software and 27-years of experience in cooperating with the world's best IC suppliers is just a part of our know-how, which we will gladly share with Embedded World visitors – emphasizes Wieslaw Wilk
