USAGE AND COMPATIBILITY

Mass storage device intended for data transfer and storage in mobile electronic devices, such as cameras, smartphones, laptops and notebook.

This product is compatible with the following operating systems:

- Windows® XP® / Vista / 7 / 8 / 8.1 / 10
- Mac OS X 10.4 and newer
- Linux

This product is dedicated for consumer-class applications. It is not intended to be used in systems that require high performance or high reliability (e.g. industrial applications), unless it is stated that the product is dedicated for these applications.

Speed class notification and UHS symbol indicates the minimum write speed. Speed class notifications that are defined by SD Association are class 2, 4, 6 and 10.

Compatibility with devices (host):

- SD host – SD cards
- SDHC host – SD and SDHC cards
- SDXC host – SD, SDHC and SDXC cards

INSTRUCTION OF USAGE

Plug the memory card into a dedicated micro card slot. To use micro card in a device with standard card slot only, please use the attached adapter (if there is any). After connecting, the card is ready to write data. Some host devices may require an additional formatting of the card before use. To get more information, please read the technical specification or product manual of the host device.

CAPACITY

Storage capacity for GOODRAM micro card is always expressed in decimal values. That means, 1GB equals 1 000 000 000 bytes. Operating system that use the binary conversion eg. 1GB equals 1 073 741 824 bytes may show lower storage capacity value than advertised. Additionally, a part of the storage is reserved for files and firmware, managing the drive.

SAFETY MEASURES
